Ethiopia

4 projects in the 3 regions of [Amhara](#), [Afar](#) & [Oromia](#)

(Underlined words can be clicked to obtain further information)

Improves the living conditions of 357.200 people

Just € 3,00 enable a person access to clean drinking water

In 2016, Viva con Agua collects € 178.408 for Ethiopia

The projects have a duration of 3-5 years and end in 2016/17

The goals differ depending on the project. However, three components are included in all project goals:

- 1) Create access to potable and safe water as well as improved sanitation facilities
- 2) Improved hygiene behavior through campaigns and trainings
- 3) Improved monitoring and maintenance of the water systems and Post Implementation Monitoring

In the last decades Ethiopia made great improvements in the water and sanitation development. However, many people still lack access to clean drinking water and sanitation facilities. Frequent droughts, as well as migration into cities such as Bahir Dar, additionally aggravate the situation.
