1. Strengthening community based institutions for water and hygiene management
2. Improve access to safe and potable water
3. Enhance health and hygiene conditions of children, adolescent and women

Improves the living conditions of 39.038 people

Just € 16,00 enable a person access to clean drinking water

In 2016, Viva con Agua collects € 161.091 for Nepal

The project has a duration of 5 years: 2015-2019

The project focuses strongly on local schools. Due to long ways to school, it is of uttermost importance that the schools are equipped with clean drinking water and sanitation facilities. Further, hygiene sensitization is particularly effective with children as they tend to adopt new behavior quickly.
